## PERSONAL STATEMENT

I am a recent university graduate with a bachelors in electronics engineering seeking a role in a company where I can contribute my ideas and be mentored towards a successful career. I am an energetic person who is self-motivated to do a great job for my employer. I have a genuine desire to learn as much as possible which means I will always be willing to carry out duties that are outside of my job description and work additional hours. Although I do not have any relevant work experience yet, I more than make up for this with my enthusiastic nature, my positive attitude, and my willingness to learn from others.
